Senior Software Engineer & Full-Cycle Solution Architect

PROFESSIONAL SUMMARY

Senior Software Engineer & Full-Cycle Solution Architect with over a decade of experience designing resilient, mission-critical web applications and enterprise systems. Expert at merging modern agentic engineering workflows with proven architectural strategies to multiply development velocity while driving regression risk to zero. More than a coder, I operate as a complete solution architect—orchestrating AI agents within strict contextual boundaries, building repeatable guardrails, and proactively balancing long-term code health against tight project deadlines. A collaborative communicator passionate about hunting down edge cases, bridging the gap between product vision and clean UI/UX, and delivering stable, highly testable software that stands up to production pressure.

PROFESSIONAL EXPERIENCE

Senior Software Developer

Jan 2022 – Present

Software Solutions Integrated — Remote / Full-time

- Instituted the team's first agentic software factory pipeline using Claude Code and Kiro, boosting individual feature development efficiency by over 50% while maintaining strict human-in-the-loop validation metrics.
- Initiated a team-wide shift toward modern React functional architecture, increasing contemporary component reuse by over 100% and scaling TypeScript coverage across 500+ new files to minimize runtime exceptions.
- Led a cross-functional UI Focus Group dedicated to addressing legacy frontend technical debt, modernizing core UI codebases, and establishing repeatable system guardrails.
- Architected full-cycle features across the full stack by building type-safe React layouts, implementing performant C# .NET APIs, and leveraging AWS cloud infrastructure for scalable data distribution.
- Mentored 7+ junior developers through structured pair programming sessions, context-aware prompting reviews, and architectural code quality guidelines.

Senior Geospatial Developer

Jan 2021 – Dec 2021

GISinc (Geographic Information Services, Inc.) — Remote / Full-time

- Architected data streams and clean UI/UX components in React to inject brand-new GIS analytical tools into existing enterprise client frameworks.
- Manipulated complex SQL Server database structures, writing and tuning highly performant stored procedures and queries to fulfill mission-critical business requirements.
- Evaluated micro and macro technical ROI during major systems updates, managing dependencies and applying foundational .NET API library upgrades to guarantee backwards compatibility and mitigate regression risk.

Geospatial Developer

May 2018 – Jan 2021

GISinc — Remote / Full-time

- Collaborated within an Agile engineering team to engineer custom enterprise solutions utilizing a full-stack blend of JavaScript, Python, and .NET web technologies.
- Refactored legacy React components to clean up structural code health, systematically expanding unit test coverage to lock down application stability.

- Hunted down edge cases and fixed subtle visual and functional bugs, continually synchronizing software states to deliver a seamless end-to-end user experience.
- Front End Developer**
Lake Superior Consulting — Duluth, MN / Full-time

June 2016 – May 2018
- Designed customized, highly specialized GIS web tools for energy and agricultural clients using a frontend stack of Angular, JavaScript, HTML, and CSS.
 - Administered spatial datasets by managing ArcSDE databases and creating highly responsive REST endpoints via ArcGIS Server integration.
 - Automated tedious enterprise data manipulation and processing pipelines by authoring custom standalone Python scripts utilizing the ArcPy framework.
- GIS Supervisor / Product Owner**
Lake Superior Consulting — Duluth, MN / Full-time

Jan 2013 – June 2016
- Steered geospatial web application development as Technical Product Owner, directly matching stakeholder business goals with iterative technical engineering blueprints.
 - Managed complex cross-functional software project schedules, communicating milestones directly with clients, organizing raw datasets, and guaranteeing zero missed production delivery deadlines.
 - Led, coached, and delegated operational tasks to a production team of analysts to hit high-accuracy delivery targets.

TECHNICAL SKILLS

Frontend Development:	React, Redux, Angular, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS
Backend & Database:	C#, .NET, Python, SQL Server, RESTful APIs, Parquet, S3 Data Extraction
Cloud & Infrastructure:	Amazon Web Services (AWS), AWS Lambda, Cognito, Git, CI/CD Pipelines
Geospatial Stack:	ArcGIS JS API, ArcSDE, ArcGIS Server, ArcPy Automation Framework
Engineering Methodologies:	Agentic Workflow Orchestration, Full-Cycle Architecture, Testing Rigor, Agile/Scrum

EDUCATION & CERTIFICATIONS

AAS — Architectural Technology	Lake Superior College • Duluth, MN
Construction Documents Technologist (CDT)	Construction Specifications Institute
Design & Architecture Coursework	Judson University • Elgin, IL
